Dodge and Jeep Trucks Pulley/Hub ID Guide 1992-97

Application:

Dodge trucks 1992 using 58-447 or 58-559. Dodge and Jeep trucks 1997-93 using 58-481 or 58-560.

Problem:

Replacement unit has a bolt on pulley. The original unit has a press on pulley.

Cause:

Mid-year design change by the OEM.

Solution:

CARDONE is now supplying this pump with a press on pulley. The new part numbers are 58-559 and 58-560.

Pump with bolt on pulley

58-447 outlet threaded
58-481 outlet not threaded

Pump with press on pulley

58-559 outlet threaded
58-560 outlet not threaded

Water Pumps

Remanufactured Best by CARDONE[®]

- Smog Air Pumps
- Vacuum Pumps
- Water Pumps

Bearings - Because CARDONE insists on high quality and reliability in every part, our use of bearings is dependent upon the type of application.

Ball/Ball bearings are used mainly on passenger cars and light duty truck applications. Ball/Roller bearings are used mainly on high torque applications, because they are more durable. This is because the roller takes up more surface area on the shaft.

CARDONE recognizes that high torque applications require Ball/Roller bearings. Therefore, when required, CARDONE will replace Ball/Roller bearings with Ball/Roller and **not substitute** a Ball/Ball bearing like some competitors. In various instances, a water pump with an OEM supplied Ball/Ball bearing is **upgraded** to a Ball/Roller bearing in order to better meet the application requirements.

Ball/Roller

Ball/Ball

- 36 month or 36,000 mile warranty
