

CARDONE FLASH² Reprogrammer receives high marks by users

As vehicles rapidly become more complex, the techniques and tools needed to diagnose and repair those vehicles are evolving at a similar pace. Keeping up with changes in technology can sometimes be a daunting task. J2534 FLASH Reprogramming is one of the fastest growing segments of automotive engineering, and CARDONE has made it a priority to remain at the forefront of this dynamic technology.

The following testimonies are from users who have benefited from the CARDONE FLASH² Reprogrammer.

“What a tool! Every real mechanic should get their hands on this easy-to-use, on-car pass-thru reprogrammer. A quick and easy moneymaker for any mechanic, and a great service for all customers. Now the dealers can’t hog all the reprogramming jobs, and I don’t ever need to send another customer away from my door. You guys came up with a real winner this time.

As a professional mechanic for the last 37 years, and a TV car talk show host for 13+ years, I applaud your

ingenuity at making such a useful tool. Keep it going for us mechanics, so we can be more and more professional with all our repair work.”

– Scott Kilmer, *Crank It Up, CBS TV*

“I have been reprogramming computers on GMs, Fords and Chryslers to the latest available update revisions to see what results are achieved (CARDONE’s system also supports Mazda, Toyota/Lexus and Honda/Acura). In every single instance, the vehicle’s performance, smoothness and fuel economy improved. Little problems, which most consumers had just grown accustomed to or accepted, are also solved. In addition, many of the updates increase transmission performance and give an overall impressive difference to the customer. CARDONE works closely with the OEMs, and their tool is well thought out and very user-friendly. Their commitment and support is unparalleled.”

– Joel Burrows, *VP, Training, Research & Development - Precision Tune Auto Care*

“We have always had superior support from our local CARDONE Sales Rep and their Technical Services department. CARDONE’s FLASH² All-Makes Reprogrammer tool is a great, easy opportunity for anyone to increase their bottom line. This program enables you to set up accounts with local garages and even the OE Dealerships to FLASH ECUs. It is possible to do as many as six to seven units a day and more! CARDONE has definitely helped Star Distributing company become more successful and profitable.”

– Walt Tomlin, *Star Distributing Co.*
